

ENERGY INFRASTRUCTURE AND MANUFACTURING INVESTMENTS ARE BUILDING WEST VIRGINIA'S ECONOMY FOR TOMORROW

West Virginia applauds Congressional enactment of bipartisan policies that support America's clean energy expansion through investments in U.S. infrastructure and manufacturing.

Energy infrastructure including solar, wind, hydropower, clean fuels, batteries, critical minerals and carbon capture will bolster West Virginia's energy resiliency and security while creating economic opportunities and jobs for tomorrow.

Continued investments in clean energy production as a critical component of the nation's all-the-above energy strategy will accelerate American-led innovation, continue fast-paced job growth, and strengthen our position as global leaders in greenhouse gas emissions reductions.

WEST VIRGINIA IS DIRECTLY BENEFITING FROM LONG-TERM INFRASTRUCTURE INVESTMENTS

\$95M

for infrastructure resilience

\$29M

for weatherization

to reduce

energy costs

\$11.4M

to make the power grid more resilient **\$267M**

to improve water infrastructure

Much of the current energy infrastructure is nearing the end of its useful life. Investing in clean energy infrastructure will ensure that the United States is energy independent while not negatively impacting the environment."

KEN HAYES

South Charleston, West Virginia

INFRASTRUCTURE INVESTMENTS ARE DRIVING JOB GROWTH AND INVESTING IN WEST VIRGINIA'S ENERGY LEADERSHIP AND INNOVATION

About 3.3 million Americans worked directly in clean energy at the end of 2022, but we know that number is just the tip of the iceberg, as many more jobs and small businesses rely on clean energy work for their economic success. Infrastructure investments in research, development and deployment of advanced energy technologies in renewables, alternative fuels, energy efficiency and grid modernization will create new job opportunities and expand existing career paths for American workers—strengthening U.S. energy security, environmental quality and economic vitality. **Current policies aim to...**

Expand U.S. Electric Power Infrastructure: Invests in renewable energy integration to better mitigate the impact of extreme weather events and natural disasters, and upgrades transmission assets to improve the grid's resiliency, flexibility and cybersecurity.

Boost Clean Energy Supply Chains: Secures the critical mineral and material supply chains needed to provide domestically produced energy while ensuring timely permitting decisions for critical mineral development on federal lands.

Invest in Energy Innovation: Builds upon the bipartisan Energy Act of 2020 providing funding for cutting-edge pilot projects in hydrogen, advanced nuclear, geothermal, hydropower, energy storage, wind, solar and energy efficiency technologies, among others.

Improve Federal Permitting Reform – But More Must Be Done: Cuts through bureaucratic red tape by making permanent FAST-41 permitting improvements, but more must be done by Congress to build the infrastructure necessary to to meet the surge in energy demand.

Support Alternative Fuel Vehicle Infrastructure: Builds out necessary charging and fueling infrastructure across the U.S.

Enhance Carbon Capture, Utilization & Storage (CCUS) and Direct Air Capture: Transformative investments in promising technologies to decarbonize existing power plants and industrial facilities.

Promote Efficient U.S. Manufacturing: Directs funding to states to invest in smart manufacturing technologies that reduce industrial emissions, creates a private-public partnership program and offers technical assessments to U.S. manufacturers.

For generations, West Virginia's rivers have been a crucial source of clean and reliable hydroelectric energy that helped power the production of coal and steel that our nation needed to become the greatest industrial might in the world. I am proud that the Bipartisan Infrastructure Law continues to invest in West Virginia and our state's energy producers that help fulfill our legacy as America's Energy Powerhouse," said Chairman Manchin."

U.S. SEN. JOE MANCHIN (D-WV)
